

HORSE Saver

HORSE Saver

WW Livestock Systems developed the WW HORSE SAVER with the help of professional cowboys to create a training system that simulates real in the saddle roping. For young and old, novice and professional, the WW HORSE SAVER provides you a perfect roping practice scenario.

The WW HORSE SAVER allows you to practice and improve your roping and tying skills, while saving your horse for the competition. The WW HORSE SAVER is beneficial for all ages and allows you to simulate horseback seating in order to practice your roping techniques and skills without the need for a horse.

Instructors can easily communicate with students by standing alongside of them and helping correct bad habits as they occur. The WW HORSE SAVER can be set up extremely fast and almost anywhere. Quickly turn the breezeway of your barn into an indoor practice pen during bad weather.

The WW HORSE SAVER is great for breakaway practice and developing that future champion roper. Be ready for the upcoming rodeo season. Remember, perfect practice creates perfect runs...

Perfect for instruction purposes.

Practice for hours, while saving your horse for competition.

* Optional Horse Saver Practice Arena available.
